

family letter

Dear Family,

Good news! We've just finished the last lesson of **play safe! be safe!**, BIC Corporation's fire safety education program for young children.

In this lesson, your child learned that matches and lighters are adult tools...just like a lawn mower, a knife, or a power saw...and that adult tools can hurt children. Most important, your child learned that if he or she finds matches or lighters the correct thing to do is to **keep away!** from them, and to **tell a grown-up to put them away.**

Please ask your child to show you the **play safe! be safe!** certificate awarded for participating in this program. Be sure to praise your child for earning this certificate and to display it in an important place in your home.

We hope you and your child have enjoyed **play safe! be safe!** and that you review these life-saving lessons together often.
